Prostate MRI Request Form

**May be Medicare elegible when referred by a Urologist or Oncologist*

Patient details

☐ **Medicare Eligible scan (please indicate which criteria met)**

Diagnostic MRI (63541) for suspected prostate cancer based on:

☐ a digital rectal examination (DRE) which is suspicious for prostate cancer.

☐ person aged < 70 years, at least two PSA tests performed within an interval of 1- 3 months are > 3.0 ng/ml, and the F/T PSA ratio < 25% or the repeat PSA > 5.5 ng/ml.

☐ person aged < 70 years, whose risk of developing prostate cancer based on family history is at least double the average risk, at least two PSA tests performed within an interval of 1- 3 months are > 2.0 ng/ml, and the F/T PSA ratio < 25%.

☐ person aged 70 years or older, at least two PSA tests performed within an interval of 1- 3 months are > 5.5ng/ml and the F/T PSA ratio < 25%.

Note: Relevant family history is a first degree relative with prostate cancer or suspected of carrying a BRCA 1, BRCA 2 mutation.
Note: Payable once per patient in a twelve month period.

Surveillance MRI (63543)

☐ patient is under active surveillance following a confirmed diagnosis of prostate cancer by biopsy histopathology; and is not planning or undergoing treatment for prostate cancer.

Note: A period of at least 12 months needs to have elapsed before benefits for a second service under 63543 are payable. Benefits are then only payable after a period of three years has elapsed from the date of the second scan and at least each three years thereafter.

☐ **Non - Medicare eligible scan**
